Towards a broader conception on nuclear science – UCE - ARN

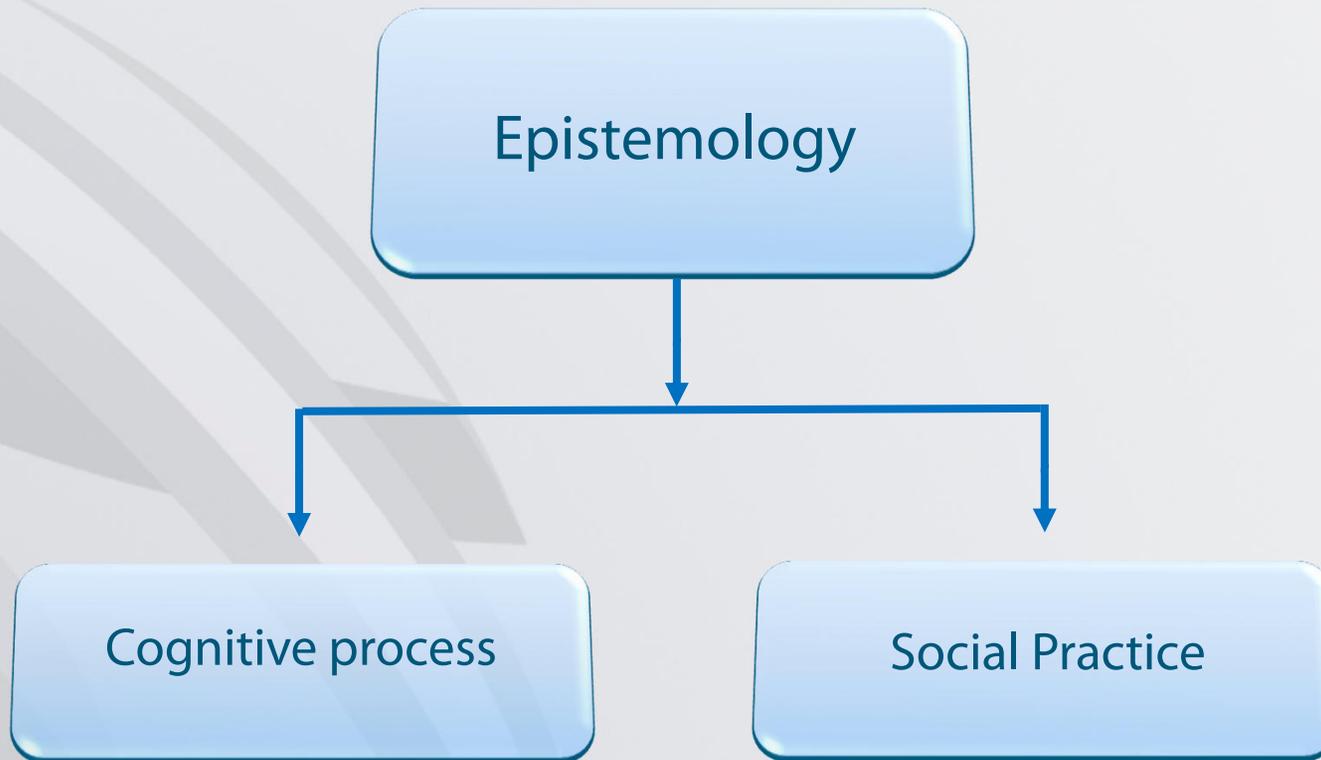

Prof. Alejandro Margetic

www.arn.gob.ar

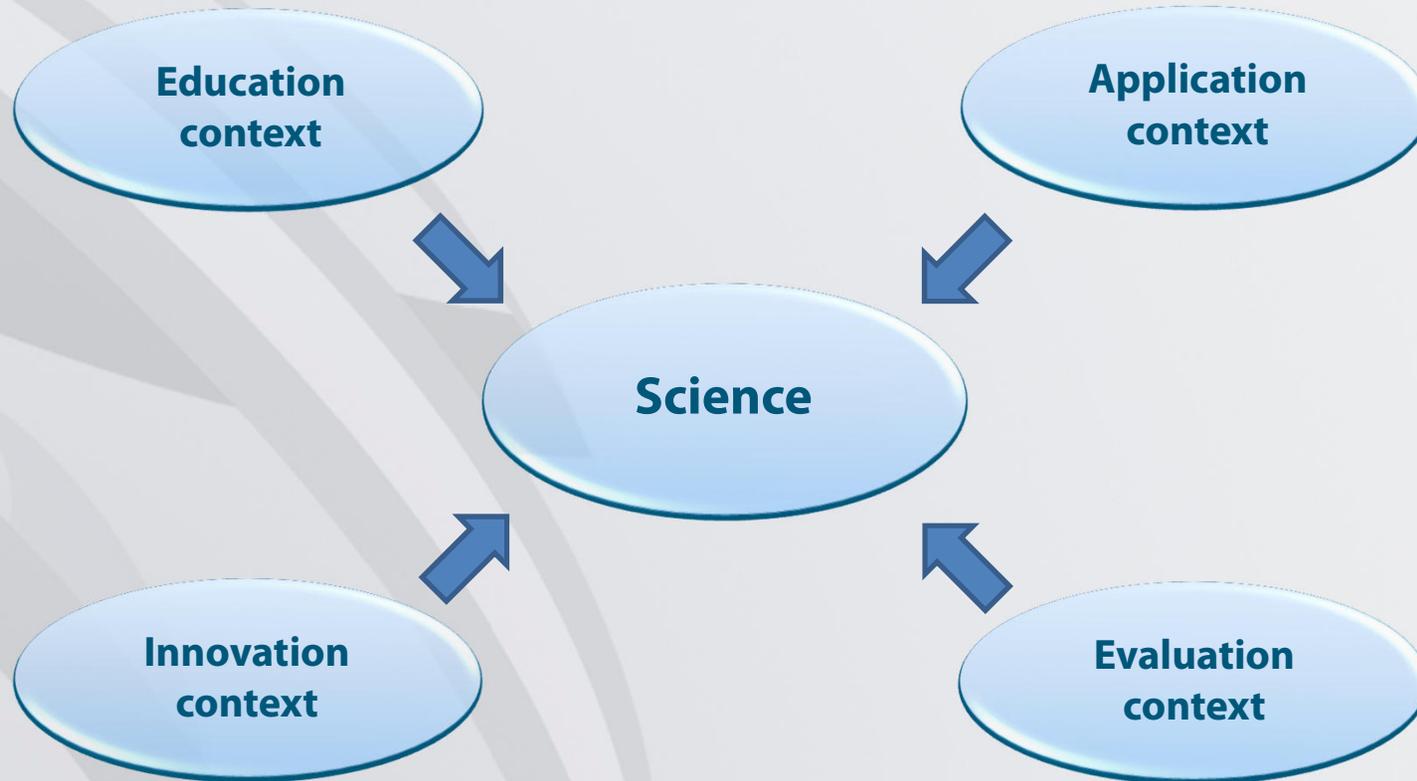

Controversies around nuclear issues

Epistemology: two perspectives

A broader epistemological perspective

Science as social practice

- From science to *techno-science*
- End of basic / applied science classification
- Social as symbolic space of production and re-production of science
- Economy, politics, ideology: influence over science development
- Nuclear energy: particles interaction + social interaction

Thanks for your attention!
